

Morning Brief Agent

An Automated Multi-source Daily Digest System

1. Project Overview

- Automatically collects daily information from multiple sources including arXiv, RSS, X, web pages, newsletters, and custom feeds.
- Filters, ranks, and summarizes content using LLMs to produce concise, high-quality digests.
- Delivers personalized morning briefs to users via Email and Feishu.
- Saves time, reduces information overload, and helps users stay ahead of key updates.

2. Motivation

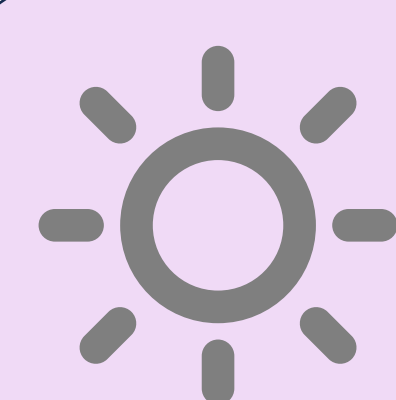

Information overloads, hard to keep up with all updates

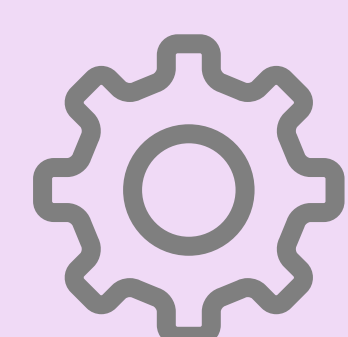

Scanning Multiple Sources everyday is **Time Consuming**

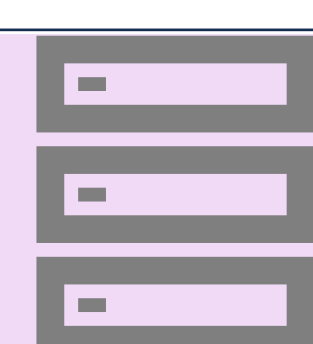

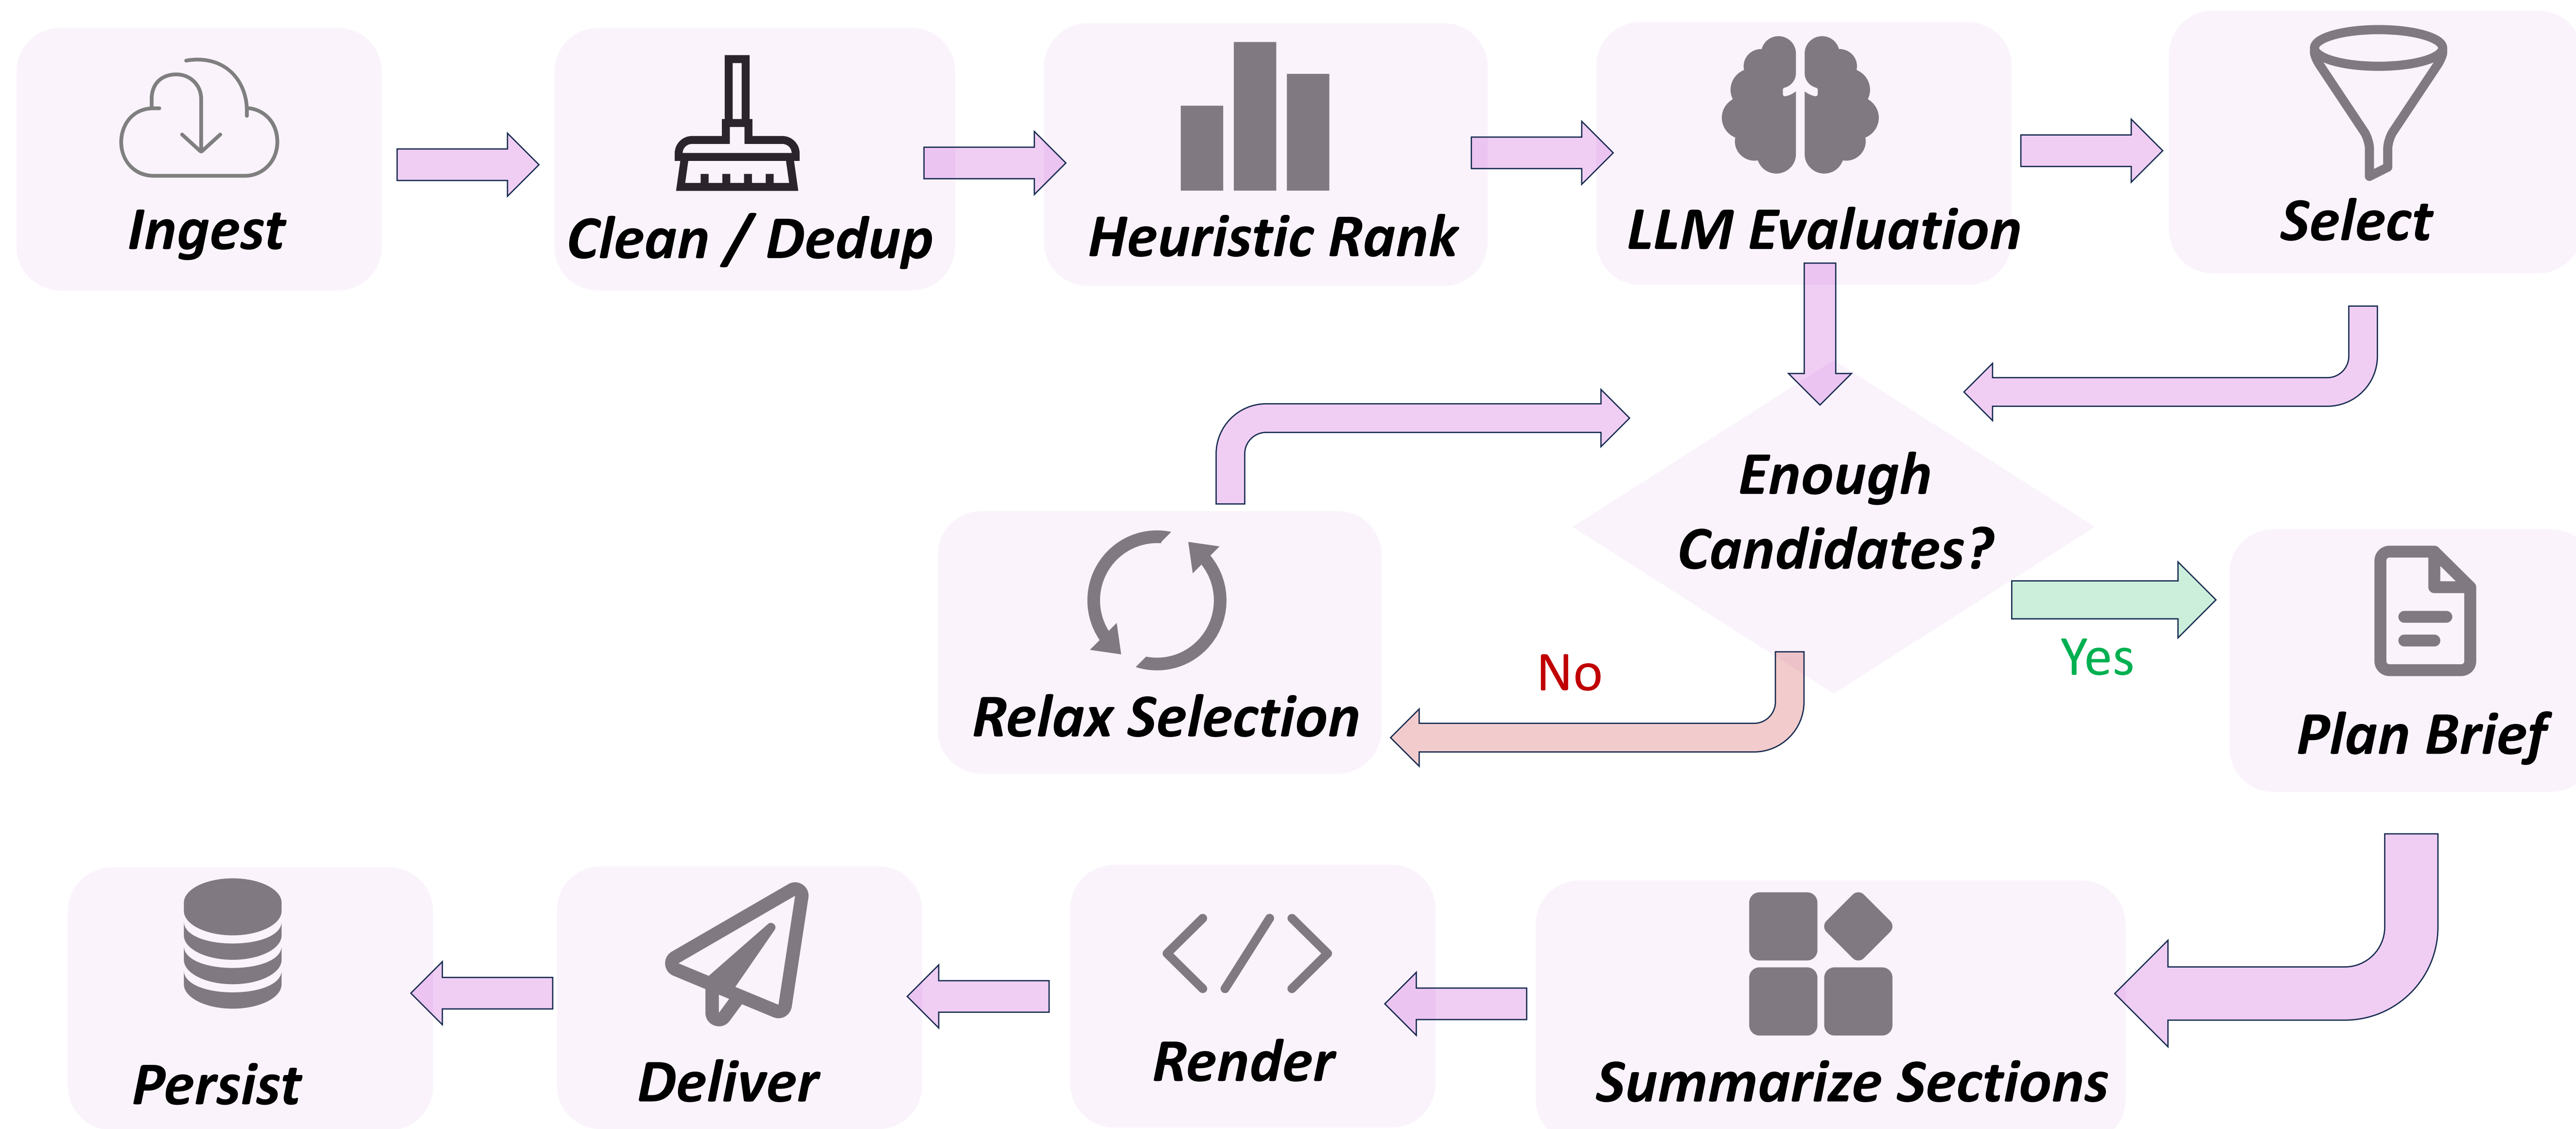

Need a **Proactive System** to summarize for us **Automatically**

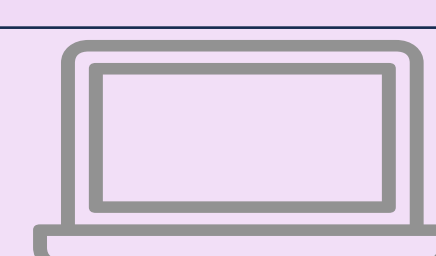

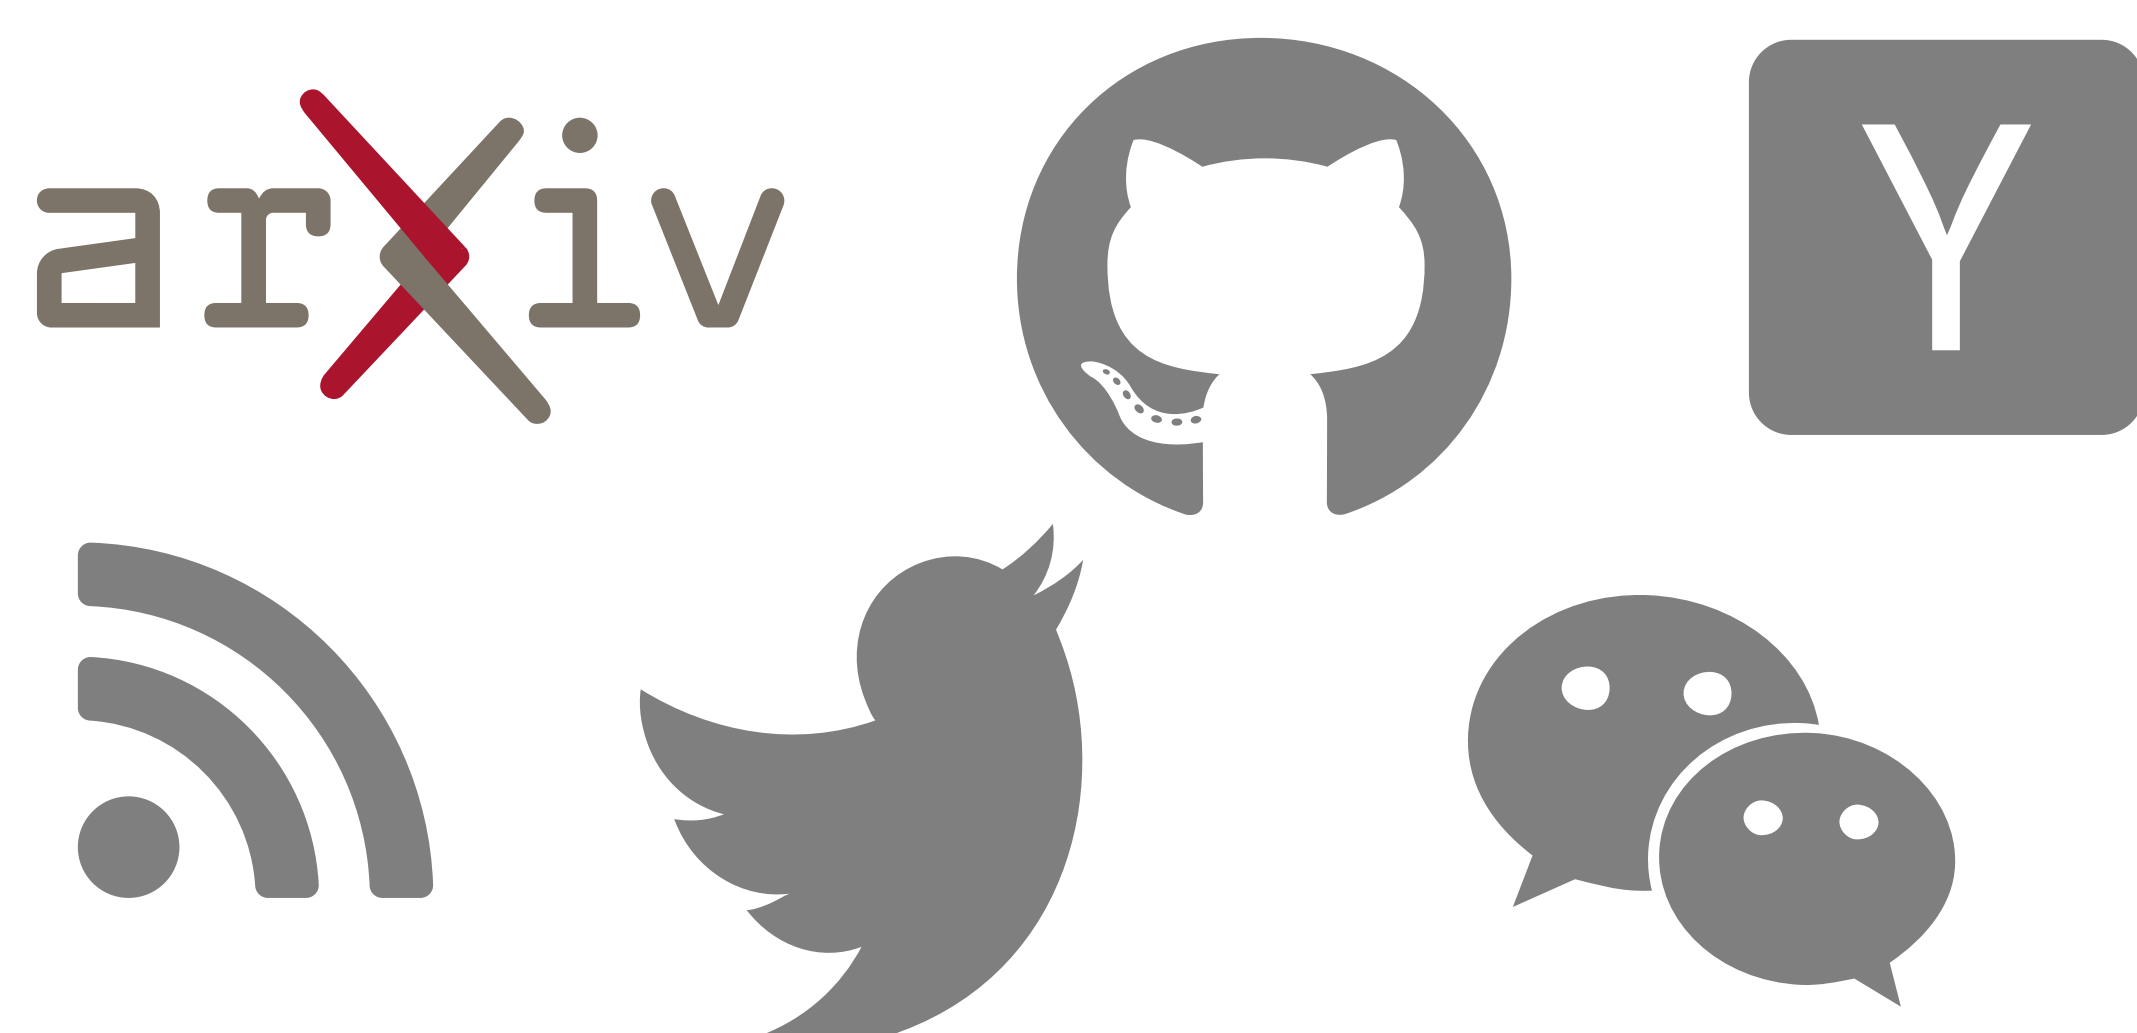

Start the day informed. Focus on what matters

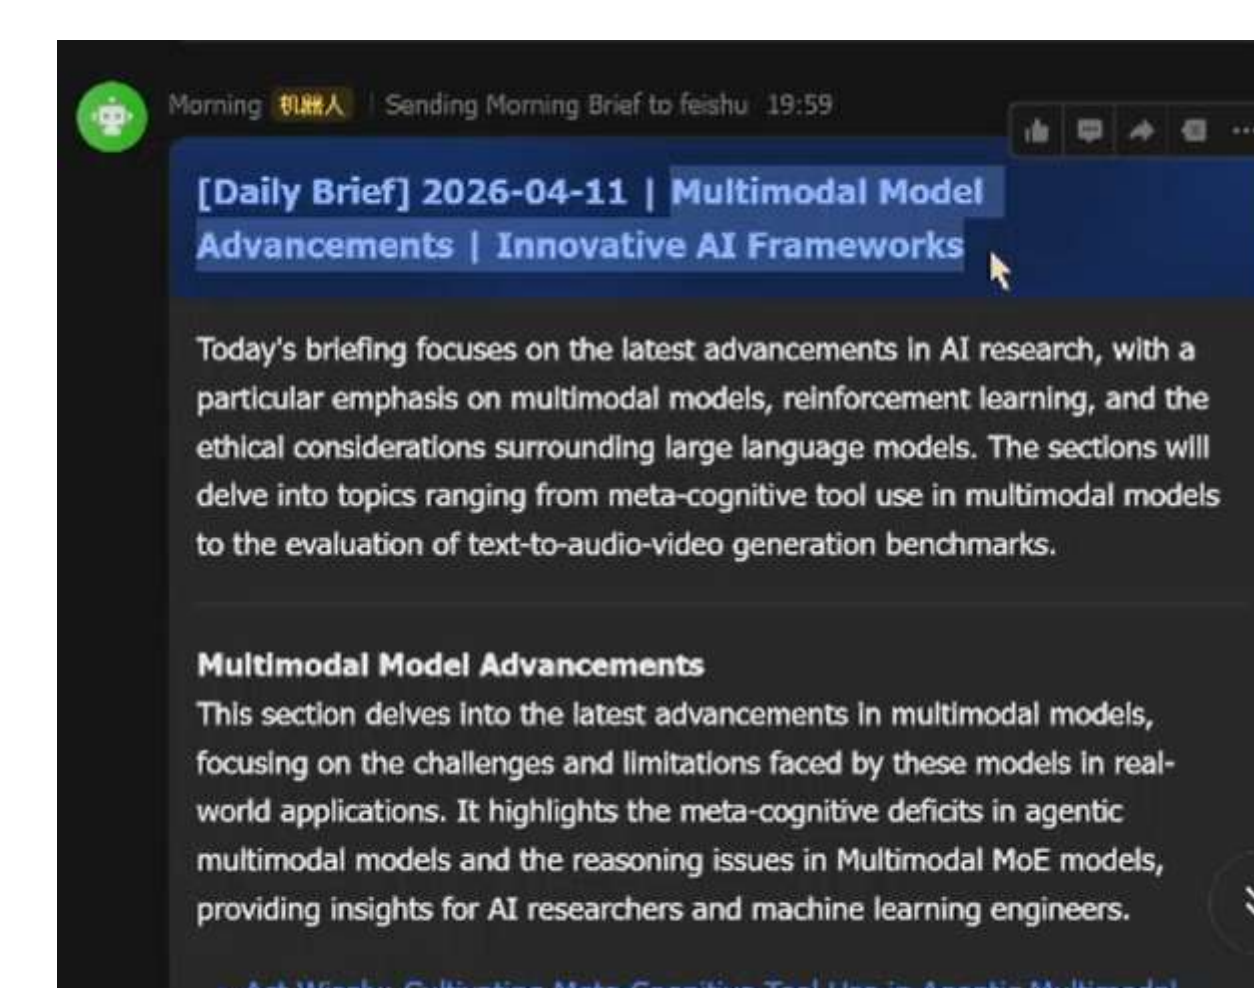

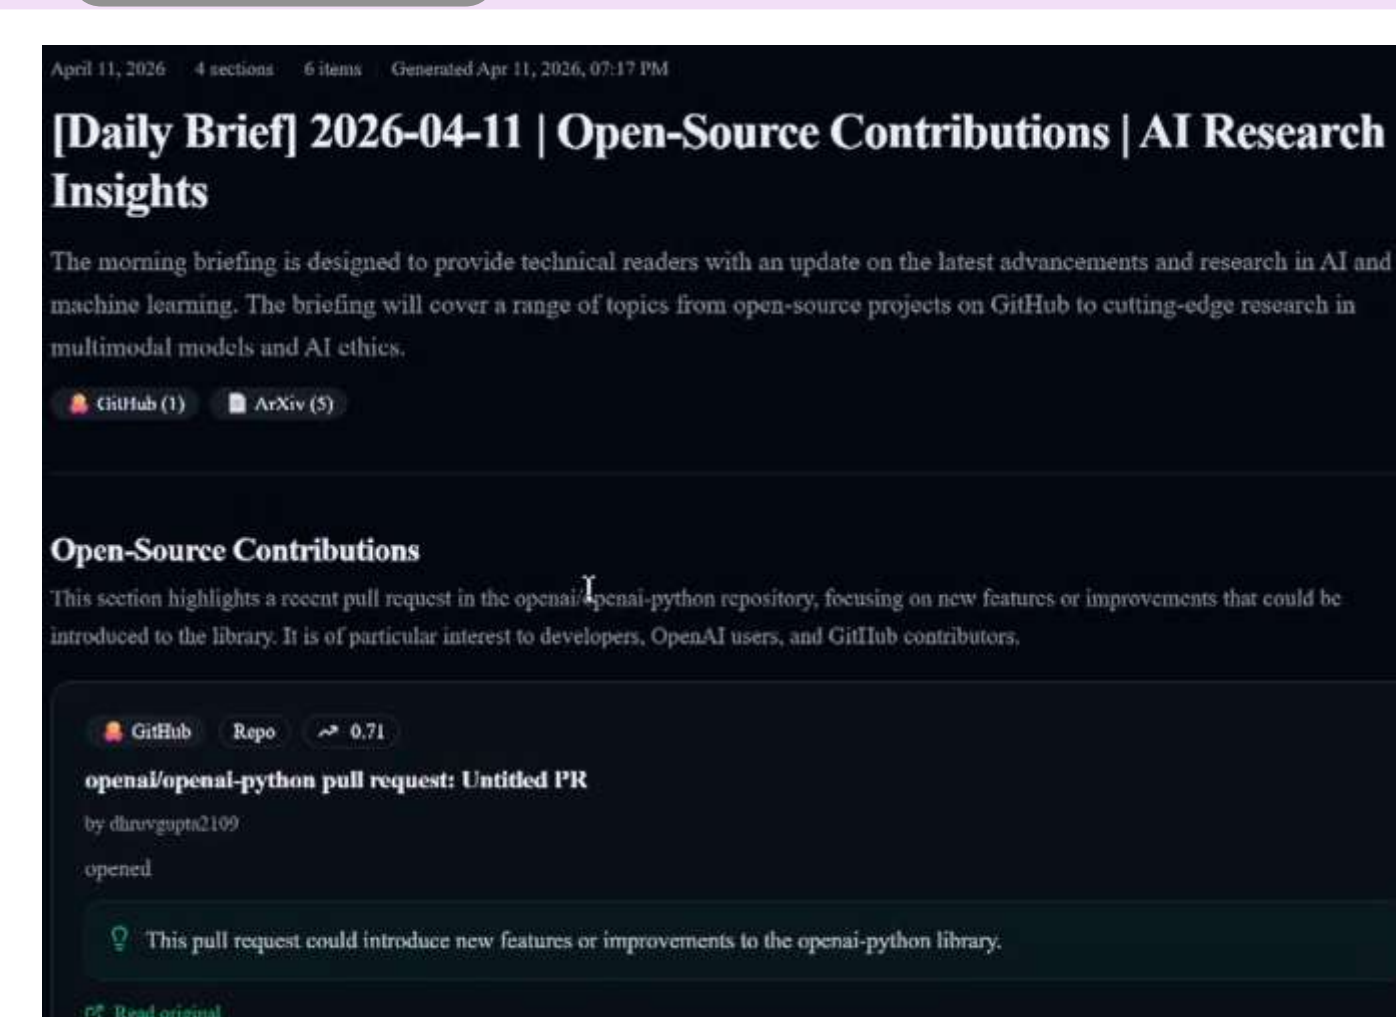

3. Execution Workflow

4. Data Source

5. Demo
